

SYSTEM DARWIN

360° i-Size

Rotating car system - ECE R129/03

CAR SEATS

The new car system with just one rotating base for two car seats.

DARWIN INFANT RECLINE

Darwin Infant Recline (40-75cm) ECE R129/03

Rearward facing from 40 to 75 cm (approximately from birth to 12 months).

DARWIN NEXT STAGE i-SIZE

Darwin Next Stage i-Size ECE R129/03

Forward facing after the child is 15 months old, approximately from 76 - 105 cm tall. Rearward facing from 40 to 105 cm and at least until the child is 15 months old, namely up to 75 cm tall.

The rotation mechanism allows the car seat to be easily turned towards the door, making it easier to place and remove the child from the car seat.

It ensures a solid connection to the car seat. It significantly reduces the risk of incorrect installation of the seat in the car (thanks to the correct anchoring indicators).

It can be used in combination with Darwin Infant, Darwin Infant Recline and Darwin Next Stage i-Size Inglesina car seats.
